Allowable Subject Matter

Claims 12-22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 12 recites an electric circuit arrangement for controlling a solenoid-operated fluid valve, comprising:

a monitoring circuit including a current-measuring device for the current, wherein:

the monitoring circuit is supplied with a set-point voltage determining a magnitude of the current,

the monitoring circuit continuously reduces the voltage supplied to the input stage starting from the set-point voltage if a time average of the current has exceeded an upper threshold value,

the monitoring circuit interrupts a connecting line leading to the solenoid coil if the time average has not fallen again below the upper threshold value after a specifiable time, and

the monitoring circuit increases the voltage supplied to the input stage again to the set-point voltage after the time average of the current has fallen below the upper threshold value.

The references of record do not teach or suggest the aforementioned limitations, nor would it be obvious to modify those references to include such limitations.
